

PROFIT CONFIDENTIAL

Dear Investor,

Monday morning, before the markets open, a select group of investors will log on to a private, password-protected web site.

There, they will find specific instructions for a proven "cash capture strategy."

Simply following these instructions could funnel huge chunks of cash into their brokerage accounts.

Here's what you need to know...

\$4,096.80—one past Monday morning, a select group of investors logged on to this secret, members-only web site. Once online, they were alerted to a "cash capture" opportunity involving an apparel manufacturer stock...

These traders were given a detailed work-up on the opportunity complete with ticker symbol, price chart, fundamental analysis and profit strategy.

Those who took action on the strategy got in at \$5.69 a share...

Less than five months later, they were given the "take profits" signal and watched as gains of 172% were funneled directly into their brokerage accounts.

Traders who bought 1,000 shares realized a "cash capture" of \$4,096.80 in their accounts...just for logging in to a special web site!

Most importantly...

This "cash capture" was not a one-time event.

In fact...*imagine having one...two...three...four...five or more of these "cash captures" going on at any one time*—feeding wads of cash straight into your brokerage account month after month after month.

You can learn all about my new "cash capture" strategy in this [video presentation](#) we've prepared exclusively for *PROFIT CONFIDENTIAL* readers.

I urge you to [see the video here now](#). There's nothing like it on the Internet. To get exclusive, groundbreaking stock market profits through my "cash capture" strategy, be sure to [see the video now](#).

Yours truly,
George Leong, B. Comm.
