

Seven Meals From Anarchy?

"If you read any economic, financial, or political analysis... that doesn't mention the food shortage... throw it in the trash, as it is worthless."

- Eric deCarbonnel, MarketSkeptics.com

Dear Reader,

My name is Kent Lucas and I am a Harvard-trained research analyst at Insiders Strategy Group (ISG).

Each and every month nearly 250,000 wealth-builders rely on us to guide them through the troubled financial markets.

And not just in the U.S....

Because we have readers in Australia, Canada, Europe, the Middle East and other parts of the world, we have to keep up with global trends, too.

What's more, at ISG, we don't manage money. Therefore, our research must stand on its own...

If it doesn't -- if we don't provide real value to our readers... if we don't help them learn how to both **grow and protect** their money -- we are out of business.

And so far, we've been able to provide that value to our readers for 22 years.

That's why I thought long and hard before I wrote this letter to you...

After all, I can't simply throw around disaster scenarios and dire predictions without solid facts to back them up.

But, after looking at all the information... I felt I had to come forward.

Why?

Because a frightening scenario is already beginning to play out in cities and countries around the world.

And I'm not just talking about the value of the dollar, the yen, the euro or even China's yuan
